

Cells4Life is the oldest and largest cord blood storage company in the UK. We are governed by some of the world's most stringent medical laws, and are currently the only stem cell storage company in the UK to have an HTA (Human Tissue with international and European standards of GLP (Good Laboratory Practice), GMP (Good Manufacturing Practice) and ISO principles. Cells4Life offer a premium package of 25 years storage, in two separate geographical locations in the UK. The sample is also sub-divided into multiple sub-divisions for ease of use in the future.

The following is information released by StemCyte Inc. and represents transplants performed using minimally manipulated, umbilical cord blood.

Cord blood Banking Transplant List for One USA Bank - StemCyte

www.stemcyte.com/cordblood-banking-transplant-list

LIST SUMMARY:

Male: 901

Female: 699

Average weight: 49KG

Average Age: 23.36 years old

Average HLA Match – 4.6/6

Average nucleated cell count – 200 million

Patient Number	Final Diagnosis Per Transplant Center	Patient Sex	Patient Weight (Kg)	Patient Age (Years)	#HLA Matches	Total Nucleated Cells
1	Acute Myelogenous Leukemia	M	14	2.6	4	84
2	Acute Myelogenous Leukemia	M	24	5.8	3	140
3	Histiocytosis-X	M	12	3.4	5	115
